

Consensus Rulemaking Statement for amendments to 12 NYCRR § 324.2

The proposed changes are ministerial. They do not change the meaning or function of any of the amended regulations. The proposed changes simply align the regulation text with the May 2, 2022 effective date of the new and updated Medical Treatment Guidelines (delayed by Orders of the Chair to coincide with phase three of the Board's OnBoard: Limited Release initiative, May 2, 2022). It is believed that there is no basis for objecting to the proposed amendments.
