Workers' Compensation Board

NYS Claims Release EDI 3.1 FROI/SROI Change 02 Required

Revised 6/22/2022

The New York State Workers' Compensation Board (Board) is transitioning to the International Association of Industrial Accident Boards and Commissions (IAIABC) Claims Electronic Data Interchange Release 3.1 (Claims EDI R3.1) standard. This document provides a quick reference on the Data Element Severity Codes which New York is requiring to trigger the 02 Maintenance Type Code (MTC) in both the First Report of Injury (FROI) and Subsequent Report of Injury (SROI) for FROI/SROI-02 transactions.

Page 3 of this document includes information regarding FROI/SROI-02 Change transactions

FROI/SROI-02 Change transactions

When you add (A), update (U), remove (R), or delete (D) information on the FROI/SROI-02, WDE will automatically detect the change and present you with a confirmation message that includes the Data Element and Reportable Change Code. If the information appears correct, you may select **Continue**.

Changed Elements		
Data Element/Segment		Change Reportable Code
0020 - Policy Number Identifier	U	
0062 - Wage	K	
0068 - Initial RTW Date	A	
0279 - Number of Witnesses	D	

If any errors are returned on the O2 Change transaction, you may be presented with an error message that contains "Data Elements missing in Change Variable Segment." This error means there are other data elements missing on the transaction. You will need to review the **NY Requirement Tables – EDI R3.1** page to determine the missing field(s).

In the example below, DN0068 (Initial RTW Date) was added to the FROI-02 and returned an error that

data elements were missing. The Population Restriction (found on the **Edit Matrix – Population Restrictions tab**) for O2 Change, pictured below, requires that DN0403 (Initial RTW Type Code) and DN0404 (Initial RTW Physical Restrictions Indicator) be populated on the O2 Change transaction if DN0068 (Initial RTW Date) is present. Once you populate the additional required fields and resubmit the transaction, it should now be accepted successfully.

WORK STATUS

Initial Date Last Day Worked: Initial RTW Type Code:

Initial Date Disability Began: **Invalid data relationship Initial RTW Date E)Data Elements missing in Change Variable Segment.**

Initial RTW Date: Initial RTW With Same:

Code	02	Initial RTW Date	E) If DN0068 (Initial RTW Date) is present
			and DN0041 (Date Claim Administrator had Knowledge of the Injury) != 1/1/00
			and the latest value of any of the following Clris have a blank or null value: DN0403 (Initial RTW Type Code) DN0404 (Initial RTW Physical Restrictions Indicator) FROI-ONLY
			Then all of the Clris listed above that have a latest value of blank or null must be included in the Change Variable Segment and must have a value.

Reminder: Timely FROI Filings

- Claim Administrators should ensure timely filings of FROI's for the Board being properly notified of the correct claim administrator
- Avoids untimely filing penalties being assessed from the Board's Monitoring Unit
- Provides information to the Board's OnBoard application ensuring prior authorization requests are given to the correct claims administrator

Most Frequent Errors Returned During the Past 90 Days

Population Restriction 0085-064A

This most common error for the last 90 days as well as the top error for 2022 was a carryover edit from eClaims R3.0. The population restriction is intended to prevent a new DN0085 (Benefit Type Code) from being introduced as a sweep benefit if not previously submitted as an Event Benefit or a SROI-UR(G)/SA included the Benefit Type Code. This is based on the IAIABC Claims EDI Section 4 rules.

DN	Report or MTC	Data Element Name	Population Restriction	Error Message Number	Error Message Text	Element Error Text (DN0291)	Length of G	Length of col H, 50 pos allowed
0085	ALL except UR(G)	Benefit Type Code	A) If DN0002 (Maintenance Type Code) is not UR(G), then DN0085 (Benefit Type Code) other than 2xx or 5xx cannot be sent on a sweep benefit unless previously sent on any prior SROI unless no SROI has been accepted or if there have been only SROI-SA or SROI-UR(G) accepted.	064	Invalid data relationship	sweep BTC must have event BTC or on UR(G)/SA	25	44

Population Restriction 0075-064C

The second most common error returned in the past 90 days is an eClaims R3.0 carryover to ensure that DN0075 (Agreement to Compensate Code) is sent as “With Liability” after the Board has issued a Notice that the case has been established with an ANCR/ODNCR finding in accordance with § 21-a.

DN	Report or MTC	Data Element Name	Population Restriction	Exception	Error Message Number	Error Message Text	Element Error Text (DN0291)	Length of G	Length of col H, 50 pos allowed
0075	All SROI except SA	Agreement to Compensation Code	C) SROI (exc SROI-SA) cannot list Agreement to Compensate Code – W if ANCR/DNCR has been established (excluding 25(1)(f) cases or ANCR/ODNCR finding pending appeal). Effective 3/15/2018	Effective 11/17/19, this edit will not be applied if DN0059 (Manual Classification Code) has been accepted as 7711 or 7370.	064	Invalid data relationship	Must be L since ANCR/ODNCR has been established	25	47

Population Restriction 0016-117

The third most common error returned in the past 90 days is another eClaims R3.0 carryover. This edit supports the IAIABC Claims EDI Section 4 Match Data rules that does not allow more than one match data element to be changed at a time (with some exceptions) on a 02 transaction.

DN	Report or MTC	Data Element Name	Population Restriction	Error Message Number	Error Message Text	Element Error Text (DN0291)	Length of G	Length of col H, 50 pos allowed
0016	02	Employer FEIN	B) If DN0002 (Maintenance Type Code) is 02 and is having this Error Message 117 occurring on it, then this Error Message 117 also occurs on this DN when its value has changed so it is easy to tell what Match Data Elements have changed.	117	Match data value not consistent with value previously reported	is a Match Data Element being changed more 1@time*	62	50

Mandatory Condition 0217-001

The fourth most common error returned in the past 90 days is another eClaims R3.0 carryover. This edit is listed on the SROI Element Requirement Table for Payee (DN0217). Payee is required when Number of Payments (DN0283) > 0.

Req Code	MTC	DN#	DATA ELEMENT NAME	BUSINESS CONDITION(S)	TECHNICAL CONDITION(S)	EXCEPTIONS
